Patent No. 6309857
GENERAL INFORMATION:
APPLICANT: Pauli, Benedicht U.
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.0052
CURRENT APPLICATION NUMBER: US/09/193,562D
CURRENT FILING DATE: 1998-11-17
                                                                                           APPLICANT: Pauli, Benedicht U.

TOTELE OF INVENTION:
TITLE OF INVENTION: Nucleothed Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

CURRENT APPLICATION NUMBER: US/10/055,412B

CURRENT PILING DATE: 2001-10-29

FRIOR APPLICATION NUMBER: US/09/193,562

PRIOR APPLICATION NUMBER: US/09/193,562

PRIOR APPLICATION NUMBER: US/09/193,562

PRIOR PILING DATE: 1998-11-17

STOLING DATE: 1998-11-17

NUMBER OF SEQ ID NOS: 47

SSEQ ID NOS: 47
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      37 ValAlaileAspProAsnValProGluAspGluThrLeuileGlnGlnIleLysAspMet

Patent No. 6309857

GENERAL INFORMATION:

JAPPLICANT: Pauli, Benedicht U.

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

TITLE REFERENCE: 18617.0052

CURRENT APPLICATION NUMBER: US/09/193,562D

PRIOR PAPLICATION NUMBER: US/00/065,922

PRIOR FILING DATE: 1998-11-17

NUMBER OF SEQ ID NOS: 47

LENGTH: 903
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   1 GTTGCAATCGACCCCAATGTGCCAGAAGATGAAACACTCATTCAACAAATAAAGGACATG

Patent No. 6309857

GENERAL INFORMATION:

APPLICANT: Pauli, Benedicht U.

TITLE OF INVENTION: Nuclectide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT FILENG DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

SEQ ID NOS: 47
